Interests
Professional:
development, design, mobile, network, machine-learning, web technologies
Personal:
sport, mountain, travelling, cooking

Education

2012–2015 **Master** in Computer Science Engineering [110/110CL]
Università degli studi di L'Aquila, Italy
Development of an IDE for the multi-mode component based software engineering framework

2013 **Cisco** Network Fundamental certification, L'Aquila
Cisco CCNA Exploration
Basic networking acknowledgment

2009 – 2012 **Bachelor** in Computer Science Engineering [110/110CL]
Università degli studi di L'Aquila, Italy
Mobile Ad-Hoc Networks in emergency context

2004 – 2009 **Diploma** of High School
Liceo Scientifico Alessandro Volta, Francavilla al Mare (CH), Italy

Experience

09/18 - Present **Blockhaus - L'Aquila, blockhauscode.com**
Co-Founder - Software Engineer - Full-Stack - Mobile - React Native
Blockhaus is a software agency located in L'Aquila.
We are developing scalable digital projects
for agencies, brands and startups

09/17 - 09/19 **CyberDyne srl - Pescara, Italy cyberdyne.it**
Software Engineer - Full-Stack - VueJS - Java
Design and development of Kimeme calculus core verticalizations

01/17 - 06/17 **BendingSpoons srl - Milano, Italy bendingspoons.com**
Software Engineer - IOS - Swift
Design and development of the world's best IOS apps

03/15 - 12/16 **CyberDyne srl - Pescara, Italy cyberdyne.it**
Software Engineer - R&D Full-Stack
Design and development of Kimeme. A multi-objective and multi-disciplinary optimization CAE software

09/14 - 02/15 **Mälardalen University, Västerås, Sweden**
Master Thesis Project - Software Developer
MCORE: an IDE for multi-mode component design

08/2013 - 09/2013 **Consel - Consorzio Elis, Roma (Italy)**
"School of Future Leader" boot camp student
Boot camp about leadership behaviour

03/2012 - 06/2012 **Udanet.eu - Chieti, Italy**
Software developer
Android application development

2009 - 2010 **WLF Publishing S.r.l - Hacker Journal**
Freelance columnist
Computer security articles (issues 191,192,194)

Awards

03/2014 **Startup Weekend, Pescara (Italy)**
2nd classified at the Startup Weekend Pescara

05/2013 **Università degli studi dell'Aquila/AUH**
3rd classified at the Android University Hackathon

My-Story

Since I was at the high school I've been fascinated from software development. At that time, by exploiting a C++ based framework, I developed a 3d-multiplayer first-person shooter. This first experience increased my passion and skills. Moreover, In that period, I developed a keen interest in system security, so I was used to help system administrators by catching and solving bugs. During my Bachelor in Computer Science I have been concerned on web and mobile development. I've been 3rd classified at the Android University Hackaton in L'Aquila: we had 24 hours to develop an Android Application about "open-data and social participation". As a side effect of the Android development, I increased my Java skills. Software engineering, mobile development and network systems are the three subjects I studied more in depth during my master's degree. I attended courses about wireless and mobile communication learning a lot about 2G, 3G and 4G technologies. Team working is my thing, and Git is my favourite versioning system. Fascinated about Startups, my jobs experiences have always been related to young environments. I worked as a software engineer at Bending Spoons, a super promising and fast growing company, which deals with IOS and Mobile applications, and Cyberdyne, a tech company focused on numerical optimization. Currently I'm working as a mobile developer at Blockhaus a software agency with solid skills on Mobile and Web Development. Moreover, I have some fitness-related apps published on the Play Store and the App Store that allows me to be updated on the mobile world.

That's me: I'm always looking for something new to try.
It's passion, not work.
