Languages
Italian
English

Interests
Professional:
development, design, app development, front-end technologies
Personal:
sport, mountain, travelling, fitness, cooking

Education

2012–2015	**Master** in Computer Science Engineering [110/110CL]
	Università degli studi di L'Aquila, Italy
	Development of an IDE for the multi-mode component based software engineering framework
2013	**Cisco** Network Fundamental certification, L'Aquila
	Cisco CCNA Exploration
	Basic networking acknowledgment
2009 – 2012	**Bachelor** in Computer Science Engineering [110/110CL]
	Università degli studi di L'Aquila, Italy
	Mobile Ad-Hoc Networks in emergency context
2004 – 2009	**Diploma** of High School
	Liceo Scientifico Alessandro Volta, Francavilla al Mare (CH), Italy

Experience

09/22 - Present	**Confidence Systems - Palo Alto, CA - Remote Working, confidence.com**
	Senior Frontend Engineer - React
	Design and development of Confidence front-end to bring Confidence to the world
09/18 - Present	**Blockhaus - L'Aquila, blockhauscode.com**
	Co-Founder - Software Engineer - Full-Stack - Mobile - React Native
	Blockhaus is a software agency located in L'Aquila.
	We are developing scalable digital projects
	for agencies, brands and startups
09/17 - 09/19	**CyberDyne srl - Pescara, Italy cyberdyne.it**
	Software Engineer - Full-Stack - VueJS - Java
	Design and development of Kimeme calculus core verticalizations
01/17 - 06/17	**BendingSpoons srl - Milano, Italy bendingspoons.com**
	Software Engineer - IOS - Swift
	Design and development of the world's best IOS apps
03/15 - 12/16	**CyberDyne srl - Pescara, Italy cyberdyne.it**
	Software Engineer - R&D Full-Stack
	Design and development of Kimeme. A multi-objective and multi-disciplinary optimization CAE software

09/14 - 02/15	**Mälardalen University, Västerås, Sweden**
	Master Thesis Project - Software Developer
	MCORE: an IDE for multi-mode component design
08/2013 - 09/2013	**Consel - Consorzio Elis, Roma (Italy)**
	"School of Future Leader" boot camp student
	Boot camp about leadership behaviour
03/2012 - 06/2012	**Udanet.eu - Chieti, Italy**
	Software developer
	Android application development
2009 - 2010	**WLF Publishing S.r.l - Hacker Journal**
	Freelance columnist
	Computer security articles (issues 191,192,194)

Awards

| 03/2014 | **Startup Weekend, Pescara (Italy)** |
| | *2nd classified at the Startup Weekend Pescara* |

| 05/2013 | **Università degli studi dell'Aquila/AUH** |
| | *3rd classified at the Android University Hackathon* |

My-Story

Since I was at the high school I've been fascinated from software development. At that time, by exploiting a C++ based framework, I developed a 3d-multiplayer first-person shooter. This first experience increased my passion and skills. Moreover, In that period, I developed a keen interest in system security, so I was used to help system administrators by catching and solving bugs. During my Bachelor in Computer Science I have been concerned on web and mobile development. I've been 3rd classified at the Android University Hackaton in L'Aquila: we had 24 hours to develop an Android Application about "open-data and social participation". As a side effect of the Android development, I increased my Java skills. Software engineering, mobile development and network systems were the three subjects I studied more in depth during my master's degree. I attended courses about wireless and mobile communication learning a lot about 2G, 3G and 4G technologies. Team working is my thing, and Git is my favourite versioning system. Fascinated about Startups, my jobs experiences have always been related to young environments. Moreover, I have some fitness-related apps published on the Play Store and the App Store that allows me to be updated on the mobile world.

That's me: I'm always looking for something new to try.
It's passion, not work.
